Education

Dwarkadas J. Sanghvi College of Engineering

Mumbai, India

B.Tech Computer Engineering, Honors in Financial Engineering | CGPA: 9.56

Sep 2024 – May 2028 (Expected)

Nirmala College (HSC - Science)

Mumbai, India

JEE Main: 97.1 Percentile — MHT-CET: 98.7 Percentile

2022 – 2024

Chatrabhuj Narsee School (IGCSE)

Mumbai, India

Grade: 7A* and 1A

2017 – 2022

Internships

Century IQ Solutions | Equity Research and Machine Learning Intern

Jun 2026 – Present

- Building a multi-asset risk engine applying Hierarchical Risk Parity (HRP) and Black-Litterman models for portfolio allocation across equities, commodities, and ETFs (e.g., AAPL, SPY, gold, oil).
- Integrating machine learning to generate return/volatility views and enhance the Black-Litterman posterior across securities in multiple markets.
- Conducting equity research to inform asset selection and translate market analysis into model inputs.
- Extending the pipeline with GARCH and LSTM models to forecast volatility and asset return dynamics as inputs to the allocation framework.

Projects

NeuraPay - Smarter Payments, Safer Families | Python, Machine Learning, Financial Systems

2025 – Present

- Trained and evaluated anomaly-detection models on a 284,807-transaction benchmark dataset, using Isolation Forest to surface fraudulent/anomalous spending in a highly imbalanced setting (~0.17% fraud).
- Developed a Random Forest classifier to categorize transactions and predict risk, with SHAP-based explainability to surface why a transaction was flagged.
- Designed secure transaction-monitoring infrastructure with user authentication and role-based access controls.

Real Estate Listing Platform | Django, React, REST APIs

2024

- Developed a full-stack web platform enabling users to browse, list, and manage real estate properties.
- Implemented backend APIs using Django and built an interactive user interface using React.
- Integrated search, filtering, and listing management features to improve property discovery.

HandyBridge - Rural Artisan Marketplace Platform | Platform Design, Market Research

2025

- Designed a technology-driven marketplace connecting rural artisans with urban consumers.
- Analyzed inefficiencies in the craft supply chain and proposed a digital framework to improve accessibility and transparency.
- Developed the conceptual platform architecture enabling direct sales and fair pricing for artisans.

Technical Skills

Programming Languages: Python, JavaScript

Machine Learning: NumPy, Pandas, Scikit-learn

Frameworks & Libraries: React, Django

Quantitative Tools: Financial Modeling, Statistical Analysis, Data Visualization

Tools: Git, GitHub

Domains: Machine Learning, Financial Engineering, Financial Modeling, Financial Statistical Analysis

Extracurricular

Model United Nations (MUN)

Mumbai, India

Delegate

2024 – 2025

- Awarded **Best Delegate** at an inter-collegiate Model United Nations conference.
- Participated in multiple MUN conferences involving policy debate, diplomacy, and international relations discussions.

Trinity College London – Piano Examinations

Mumbai, India

Piano Student

2016 – 2019

- Completed Trinity College London graded piano examinations up to **Grade 3**.
